

# TRAC Breathalyzer™

## EXTRA LONG BATTERY LIFE

The battery of the TRAC Breathalyzer will last a minimum of 180 days on a single charge.

## ANY PHONE ANY PROVIDER

The TRAC Breathalyzer works with iOS and Android and can be used on any wireless network and WiFi.

## ACCURATE PHOTO IDENTIFICATION

Photo identification requires high-quality photos, and the TRAC Breathalyzer achieves the best photos in the industry.

## ADVANCED FACIAL RECOGNITION

The TRAC Breathalyzer uses Facial Recognition and Liveness Detection so you never have to guess who is taking the test.

## AUTOMATED COMMUNICATIONS

Whether it's an appointment reminder or a message of encouragement, custom messages can be sent directly to the participant's phone as a push notification or integrated into the test process..

## RESULTS YOU CAN TRUST

Fuel cell technology, integrated mouthpiece and tamper sensors ensure reliable test results.

# Tracking Real-time Alcohol Consumption

Monitorees simply download the TRAC app on their smartphone, take a selfie while blowing into the TRAC Breathalyzer, and the test results are immediately available on our user-friendly web portal.

TRAC Solutions believes every electronic monitoring device has 3 essential duties:

## 1. Securely monitor.

Don't let its lightweight and pocket friendly design fool you. The TRAC Breathalyzer is a rugged device boasting robust security features that are raising the standard in alcohol monitoring.

- Facial recognition and liveness detection ensure tests are performed by the monitoree.
- Test results display GPS location.
- Case tamper sensors and an integrated mouthpiece prevent tampering.
- The TRAC Breathalyzer uses fuel cell technology to deliver highly accurate BrAC readings.

## 2. Streamline the monitoring process for the monitoring agency.

The TRAC Breathalyzer is easy to use for both the monitoree and the monitoring agency. Both mean less work for the monitoring agency.

- Setting up a new monitoree in the TRAC Solutions web portal is quick and simple.
- The TRAC Breathalyzer's battery can last at least 180 days on a single charge. This means spending less time reminding monitorees to charge their device.
- No need to use a special charger; the battery can be charged using any micro USB.
- Automatic and on-demand messages can be sent directly to the monitoree's smartphone, reminding them of appointments, court dates, and congratulating them on achievements.

## 3. Raise compliance rates

The TRAC Breathalyzer is equipped with features to increase compliance.

- Patented phone cradle positions the smartphone at the optimal distance making it easy for the monitoree to submit the perfect photo.
- The extra long battery life means never having to worry about charging the TRAC Breathalyzer.
- 7 push notifications per test are delivered to the monitoree to remind them to take a test.
- Monitorees can preview their photo to ensure a compliant photo is submitted.
